

Excellence in Temperature Sensing

March 16, 2020

RE: COVID-19 Update

EI Sensor Technologies is taking the COVID-19 outbreak seriously and is monitoring the situation closely. We acknowledge the potential impact around the world is unpredictable, but we remain committed to managing our delivery timeliness in a proactive and comprehensive manner.

We are working with our suppliers and partners to ensure there will be little or no delay in continued production and supply of products. Any delays we learn about will be communicated immediately to our customers, and action will be taken to minimize the effect of any shortages.

EI Sensor has temporarily halted any business trips until the situation stabilizes but our team continues to work normal hours. We do not anticipate any day to day business interruption. Special measures instituted to ensure the health and safety of our employees include:

1. Heightened sanitizing procedures.
2. Colleagues will stay home if they are sick or experiencing any symptoms.
3. Minimizing working in close proximity to each other.
4. Reducing/eliminating any visitors to the office.

Communication during times like this are crucial. If you have any questions or concerns, please let us know right away.

We will continue to monitor the situation and make changes as needed based upon the recommendations by the CDC.

Thank you for your business and your continued support. Stay safe.
