## Picker Coronavirus Lead Time Update

March 11, 2020

Dear Valued Customer,

As a follow up to our last Coronavirus lead time informational release, we would like to provide the most up to date information regarding lead times.

Here is the current status of our major relay lines as of the time of this writing. We are excited to report that relay lead times are improving!

**-Solid state and the PC775 electromechanical relays-Current lead time is 11-12 weeks by ocean after receipt of the order.**

**-All other electromechanical relays- Current lead time is 19-24 weeks via ocean after receipt of the order.**

Further reductions in lead times are expected as we move into April.

If you are in a bind, air freight is always an option and can reduce your lead time by about 4-5 weeks.

Please contact Picker if you have any questions, or if we can help you resolve your lead time dilemmas.
